

Senior Capstone Experience

Western Technical College, Winona State University & Viterbo University

2015

Capstone: The final clinical rotation before a senior nursing student graduates

Clinical Faculty Coordinator: College/University contact person who oversees experience

Preceptor: Primary R.N. assigned with student

Key Points for Course Outcomes/Objectives

School will:

- Provide an academic handbook to the preceptor.

Student will:

- Provide goal expectations to the preceptor.
- Be assigned with designated preceptor and must meet identified hours based on program. Capstone shifts will be assigned when other clinical groups are not working on the unit.
- Provide nursing care for a full assignment by the end of the experience.

Preceptor will:

- Supervise student's patient care and documentation, both written and oral.
- Supervise medication administration, technical skills, and IV management.
- Promote student critical thinking and decision making skills by mentoring priority setting, evidence-based care, advocacy, and quality care.
- Communicate and collaborate with the student and clinical faculty. Any concerns/questions regarding student performance will be communicated to faculty.
- Complete a clinical feedback form of student's performance and/or other evaluations as requested by the school.

Thank you for choosing to work with future nurses!
